EXPERIENCE

UX Researcher & Designer | AI Game & Governance Lab, UC Davis

OCT 2025 – PRESENT

- Simulation accepted at AMIA 2026; translated PI's early-stage concept into a full scenario system where healthcare professionals navigate AI adoption decisions across the full development lifecycle
- Designed variable-driven decision frameworks across 20+ clinical cases modeling legal, ethical, and organizational tradeoffs, enabling exponential outcome paths from a single scenario seed

UX Research Director | The AI Collective

SEP 2024 – PRESENT

- Grew from research associate to leading the UX team within first year; spearheaded end-to-end feedback research across 6–7 events per quarter: iterating on survey instrumentation, synthesizing qualitative and quantitative responses, and presenting findings to a 40-person leadership board
- Conducted mixed-methods analysis combining Likert-scale satisfaction data and thematic coding of open-ended responses, delivering synthesis reports to a 40-person leadership board that directly shaped event programming

Events Operations Director | Google Developer Student Club

AUG 2024 – JUN 2025

- Owned end-to-end production of "Build with AI" flagship event: sourcing speakers, shaping program content, moderating panels, and managing event logistics for 80+ attendees
- Coordinated 12+ technical events across the year including workshops and project showcases, managing a \$3K budget

Marketing & Design Intern | Global Ventures Studio

JAN 2025 – MAR 2025

- Directed visual and narrative design of investor-facing launch materials for FusionCare AI's debut at the J.P. Morgan Health Care Conference 2025, with full creative direction on deck and brand assets

PROJECT HIGHLIGHT

Event Feedback Intelligence Tool | Internal Product- The AI Collective

JAN 2026 – PRESENT

Live Link: <https://aic-events.vercel.app/>

- Designed end-to-end research infrastructure: survey instrumentation, automated qualitative synthesis via Claude API, and an interactive dashboard enabling leadership to filter insights by demographics and engagement level

PantryFan | HCI 164 Team Project

JULY 2025 – SEPTEMBER 2025

- Led UX design for a meal planning app targeting food-insecure families: developed user personas, wireframes, and end-to-end prototype optimizing meals for budget, nutrition, and local food bank availability

EDUCATION

B.S of Cognitive Science, Computational Emphasis | University of California, Davis

SEP 2023 - JUN 2026

- GPA:3.7/4.0; Dean's Honors List: Fall 2023, Winter 2025
- Relevant Coursework: Human-Computer Interactions, Research Methods, Data Structures, Artificial Intelligence, Cognitive Psychology, Statistical Analysis of Psychological Data

SKILLS

Design & Research — Figma, Usability Testing, User Interviews, Survey Design, Mixed-Methods Research

AI & Development — Claude API, Python, Pandas, JavaScript, HTML/CSS, SQL, Git, Vercel

Analytics & Tools — Google Sheets, Excel, Behavioral Data Analysis, Process Optimization, Workflow Automation, Notion, Canva
