EXPERIENCE

- UX Designer & Researcher** | AI Game & Governance Lab, UC Davis OCT 2025 – PRESENT
- Took ownership of an ambiguous early-stage concept from PI and drove it to a fully scoped simulation system accepted at AMIA 2026, presenting findings to a clinical informatics audience
 - Designed a variable-driven decision framework across 20+ clinical cases, producing exponential outcome paths from a single scenario seed
- UX Research Director** | The AI Collective SEP 2024 – PRESENT
- Grew from research associate to leading the UX team within one year; owned end-to-end product feedback cycles across 6–7 events per quarter, closing the loop between user data and programming decisions
 - Translated mixed-methods research into product decisions that directly changed event programming across 300+ attendees, presenting findings to a 40-person leadership board
- Events Operations Director** | Google Developer Student Club AUG 2024 – JUN 2025
- Owned full lifecycle of "Build with AI" flagship event, from scoping and speaker sourcing through execution and logistics, for 80+ attendees; managed cross-functional coordination across 12+ technical events on a \$3K budget with a programming focus on AI tooling and developer education.
- Marketing & Design Intern** | Global Ventures Studio JAN 2025 – MAR 2025
- Led creative direction on investor-facing launch materials for FusionCare AI's J.P. Morgan Health Care Conference debut, translating early-stage product narrative into polished pitch assets

PROJECT HIGHLIGHT

- Event Feedback Intelligence Tool** | Internal Product- The AI Collective JAN 2026 – PRESENT
- Live Link: <https://aic-events.vercel.app/>
- Scoped, built, and shipped a full-stack AI product solo, from research infrastructure design through Vercel deployment, replacing manual review of 50+ event feedback responses per event
 - Integrated Claude API for automated qualitative synthesis; built interactive dashboard with demographic filtering and Chart.js visualizations, delivering a production tool actively used by organizational leadership
- PantryFan** | HCI 164 Team Project JULY 2025 – SEPTEMBER 2025
- Led end-to-end UX for a meal planning app, developed personas, ran user research, produced wireframes and a full prototype, translating real user needs (budget, nutrition, food bank access) into a structured, testable product

EDUCATION

- B.S of Cognitive Science, Computational Emphasis** | University of California, Davis SEP 2023 - JUN 2026
- GPA:3.7/4.0; Dean's Honors List: Fall 2023, Winter 2025
 - Relevant Coursework: Human-Computer Interactions, Research Methods, Data Structures, Artificial Intelligence, Cognitive Psychology, Statistical Analysis of Psychological Data

SKILLS

Design & Research — Figma, Prototyping, Usability Testing, User Interviews, Survey Design, Mixed-Methods Research
Technical Skills — Claude API, Python, JavaScript, HTML/CSS, Vercel, Git, SQL, Pandas
Analytics & Tools — Behavioral Data Analysis, Google Sheets, Excel, Notion, Canva
